

Dear Members of the FCC:

The attempt by the National Association of Broadcasters to restrict satellite radio from offering traffic and weather and other valuable services to its listeners is anti-competitive and I urge you oppose HR 4026. As the FCC, you must maintain free and open access to satellite radio services for which I am a subscriber. I find it insulting that the NAB would try to restrict the kinds of information that I receive from subscription satellite services and you should not support any bill that tries to censor satellite radio.

Thank you,

Irv Nachamkin
